Frontend developer and Javascript engineer equipped with extensive experience in delivering engaging and visually compelling projects with user-friendly interactions that drives business growth and improve UX.

Experience

09/2021 to 05/2022

Personal Projects

I believe programming can only be mastered by doing, so I am constantly learning to improve myself by building projects for learning. [You can find some projects I have worked on here.](#)

- [Google Clone](#)
- [Netflix Clone –movie app](#)

I look forward to gathering more real-life experiences from your internship program. I am motivated to learn and improve.

11/2016 to 05/2019
